

The Federal Communications Commission

Dear The Federal Communications Commission,

I do not want to pay more for my telephone service! I urge you to reject a flat fee proposal that would change how contributions are made to the Universal Service Fund. I am concerned that this proposal could make my current service unaffordable.

Under the flat fee proposal you are considering, people who make few long distance calls would pay the same as people or businesses that make many calls. In other words, low-volume and primarily residential customers would bear the same universal service fund burden as a high-volume residential or business customers. This is unfair!

I use my wireless phone for safety, security and convenience. I don't want to lose these benefits so that big businesses can pay less than their fair share. I urge you to reject the proposal to move the USF collection system to a flat-fee.

Keep the USF Fair!

My phone bill used to be about \$14.00 now it is already up to \$33.00 just for a standard hook up and no long distance carrier. Just how far do you want to put us lower class Americans in dept. I already think that alot of your fees are to much. I thought that you were suppose to be for the American public and not the high rated utilites companies.

Thanks much for giving this your consideration.
Julius M. Shamrock

Sincerely,

Julius M. Shamrock
